## Our compact high-performance Heraeus Primo and Primo R centrifuges offer the functionality of three centrifuges.

The Heraeus Primo and its refrigerated counterpart, the Heraeus Primo R are microliter, high speed and general purpose centrifuges all at the same time.

### Rotor Flexibility

Six fixed angle, swinging bucket and microliter rotors for all common tubes from 0.2 to 100 mL are available for applications using microliter, DIN, blood sample and Falcon® type conical tubes. A 12-place swinging bucket rotor for micro tubes is available for the Heraeus Primo R.

### User-Friendly Technology

The automatic rotor recognition system identifies the rotor being used and allocates individual parameters to improve lab efficiency. Rapid acceleration and braking times minimize

waiting and ensure rapid sample processing. Low noise levels during operation provide a more comfortable working environment.

### Imbalance Recognition

The Heraeus Primo series is equipped with electronic imbalance recognition. Not only does it react if the centrifuge is loaded incorrectly, but it also registers imbalances during a run caused, for example, by tube breakage. Centrifugation is interrupted and the user can remove the rotor and, if necessary, decontaminate it.

### User Comfort

The Thermo Scientific EASYcontrol® II user panel clearly displays all parameters. Self explanatory symbols, which are internationally recognized, and the clear arrangement of function keys help you avoid incorrect operation. The time and speed parameters are set with the easy-to-clean touch panel. Two acceleration and nine braking curves are available for sensitive samples.

## Typical Applications

- Sedimentation of cells (algae, yeast, bacteria, etc.)
- Sedimentation of cell organelles and cell fragments
- Sample preparation for HPLC, (capillary) electrophoresis, etc.
- Separation of DNA and protein precipitates
- Blood and urine analysis
- Centrifugation of standard test series in microliter tubes

## NALGENE® and NUNC™

Trust NALGENE and NUNC centrifuge bottles and tubes to deliver quality and performance. These products are in conformance with ISO 13485: 2003, cGMP and USP Class VI; you'll find updated speed ratings and lot specific product certificates online. Available in a variety of resins, with capacities from 10mL to 2L, Nalgene and Nunc are guaranteed a perfect fit to FIBERLite® rotors and Thermo Scientific centrifuges.

Heraeus Primo and Primo R, the ideal centrifuge for:

- Small medical laboratories
- Biochemistry and molecular biological research
- Routine analysis in industrial laboratories

### Thermo Scientific Highconic® Rotor

- Fixed angle rotor for 6 x 50 mL with max. 10,000 x g
- The flat angle of 45° ensures that sample material does not run out and the pellet forms at the bottom of the tube
- Adapter for highspeed tubes from 1.5 to 50 mL and 15 or 50 mL conical Falcon™ type tubes

#### Highconic Rotor 45°

### Rotor Safety

Centrifuge rotor maintenance is critical to the safety of your lab. We offer rotor safety seminars and rotor inspection and safety clinics to ensure the longevity of your investment, and the safety of your workplace. If you would like to learn more about hosting a clinic at your facility or taking part in one at one of our facilities, please contact your local Thermo Scientific product representative for further information or visit [www.thermo.com/rotors](http://www.thermo.com/rotors)
